SECRET

- /8. OL completed installing the Field Computer System at five major Office of Communications bases. This system is a microcomputer-based inventory control and accountable property system developed to support logistics officers in the field.
- 9. OL has completed moving the Office of Scientific and Weapons Research from the Original Headquarters Building to the New Headquarters Building.
- 10. The Office of Finance has implemented an automated system for processing payment of invoices from other government agencies. This system streamlines tasks such as matching requisition and billing items and identifying price and quantity discrepancies.
- 11. The Office of Security conducted a successful test of the Security Information Management System (SIMS) name check interface system with the FBI, paving the way for full operational capability on 6 September.

13. The Office of Training and Education signed an agreement with the Federal Bureau of Investigation to exchange foreign language testing services and test instruments. The agreement will save both organizations thousands of dollars in test development costs and prevent duplication of effort.
